and blockchain technology,
cryptocurrency

EXPERIENCE

IPG MEDIABRANDS | *SOFTWARE ENGINEERING INTERN*
June 2019 - August 2019 | San Francisco, CA
- Developed two microservices of the Unity Platform standalone screenshot tool to compress image file size by 75% and automate an Amazon SES using Typescript.
- Provided 80% unit testing code coverage through Jest.
- Dockerized creatives web application and deployed onto Kubernetes. Created replicas and a proof of concept of scalability.

ITS LEARNING TECHNOLOGIES | *IT CONSULTANT*
January 2018 - Present | Santa Cruz, CA
- Assisted customers in the use of computer equipment and software, with an emphasis in teaching computer proficiency to novice users
- Troubleshot and reported hardware issues, and ensured that the hardware is used properly and is not being abused

PROJECTS

PERSONAL WEBSITE
- Created personal online portfolio containing personal projects with HTML/CSS and hosted site on github. Implemented Bootstrap framework.

CARD MATCH
- Developed iOS card matching application. Implemented UIKit, Model-View-Controller user interface design, and card matching logic with flip animations and sounds.
- Used storyboard segues to add start screen and multiple card themes.
